

# 15th MiningForum – 27. & 28.06.2019, Estrel Berlin

## Invitation

### MiningForum – The international mining hub

„Glückauf“ Ladies and Gentlemen,  
dear colleagues and partners,

Our successful event will continue with the 15th MiningForum, to be held on 28th and 29th June 2019 at the Estrel Congress & Exhibition Centre in Berlin, where the open and bright foyer of the Estrel Halls will create a modern and impressive backdrop for the exhibition.

In the tradition of the MiningForum, we expect outstanding experts and top decision-makers of the mining industry to attend, as well as specialists, operators, (public) institutions and service providers – all in this exclusive setting. National and international presentations by well-known

speakers will offer a 360-degree perspective of the topic of mining and natural resources. Following on from the last conference with more than 350 participants and 30 exhibitors, the MiningForum offers excellent contacts and profitable dialogues in an appealing atmosphere – the optimal framework for targeted communication and first-class networking. With media representatives of mining and natural resources publications also attending, you can be sure that content from the event will be published in the relevant channels. The integrated trade exhibition offers companies an ideal opportunity to present themselves and their products and/or services.
